Inclosure Feature:

Single item w/housing

Test Type For Which Designed:

Function evaluation and fault isolation on receiver assembly

Supplementary Features:

Contains specially designed test set panels which when interfaced with associated instruments will provide power and signal inputs and monitor outputs; measures continuity, waveforms, voltage and currents and provides electrical loads; speaker to monitor received audio signal is located in front panel; input/output components are located in top panel; power supplies; cooling air fan; line filter

Fsc Application Data:

F-16 air defense fighter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T228-a
