**Overall Length:**

2.800 inches

**Overall Width:**

2.800 inches

**Operating Temperature Range:**

-40.0/+132.0 degrees fahrenheit

**Operating Control Method:**

Automatic

**Circuit Construction Type:**

Solid state

**External Dc Operating Voltage In Volts:**

24.0 1st voltage

**Special Features:**

20ma maximum current; reverse polarity protected; freq response p/m 5 percent; 5hz to 15khz referenced to 100hz; full scale output 15v peak to peak

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
