Component Type And Quantity:

2 relay and 2 diode and 1 transistor and 8 capacitor and 12 resistor and 1 switch and 3 jack and 1 inductor and 1 insulator

Special Features:

Printed circuit board 2, integrated circuit 16, plug connector 1, edge connector 1; forms a portion of a wattmeter; 26 contacts on edge of connector; test set, elect. Equip.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A51110
