Unit Type:

Vertical plug-in

Special Features:

80 channels per card; binary, octal, decimal, hexadecimal, ascii display; 5 clock inputs; 100 mhz logic analyzer; probe voltage porm 40 v; memory data acquisition 1024 samples/channel; types of analysis: 25 mhz state, 100 mhz timing, simultaneous state/state, simultaneous state/timing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
