Overall Length:

32.100 inches

Overall Height:

12.000 inches

Overall Width:

17.500 inches

Special Features:

Includes wiring between the shop replaceable unit mating connectors and system resource interface connections of the gen rad 2751; load, signal conditioning circuits; input circuit paths for power, stimuli, signal sequencing, and conditioning; output circuit paths for logic analysis, loads, signal conditioning; voltage range minus 4 v to plus 5.25 volts

Functional Description:

Provides interface between recorder reproducer control/serial input/output module assembly, p/n a205a485-01, and global memory

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
