Overall Length:
32.100 inches
Overall Height:
12.000 inches
Overall Width:
17.500 inches
Special Features:
Includes wiring between the central processor unit module assembly, p/n a538r883-01, mating connectors and the system resource interface
connections; load, signal conditioning circuits, and special switching circuits; input circuit paths for power, stimuli, signal sequencing; output
circuit paths for logic analysis, loads, signal conditioning; provides connections to the clock generator circuits
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Filg:
A537k0
