**Overall Length:**

32.100 inches

**Overall Height:**

12.000 inches

**Overall Width:**

17.500 inches

**Special Features:**

Includes wiring between the central processor unit module assembly, p/n a538r883-01, mating connectors and the system resource interface connections; load, signal conditioning circuits, and special switching circuits; input circuit paths for power, stimuli, signal sequencing; output circuit paths for logic analysis, loads, signal conditioning; provides connections to the clock generator circuits

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A537k0
