Overall Length:

16.500 inches

Overall Height:

9.125 inches

Overall Width:

11.250 inches

End Application:

An/urc-10 (v) 4, radio set

Special Features:

Includes wiring between the shop replaceable unit (sru) mating connectors and system resource interface connections of the ats-2000 f75; load signal conditioning circuits and special switching circuits for the sru and or ats-2000 f75; input circuit paths for power, stimuli, signal sequencing and conditioning to satisfy the sru test requirements; output circuit paths for logic level analysis, voltage measurements, rf measurements, loads, signal conditioning to verify sru operation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A537k0
