Overall Length:

16.500 inches

Overall Height:

9.125 inches

Overall Width:

11.250 inches

End Application:

An/urc-10 (v) 4, radio set

Special Features:

Bincludes wiring between the powersupply/predriver circuit card assembly, p/n 676-4526-001, mating connections andthe system resource interface connections of the ats-2000 f75; load signal conditioning circuits and special switching circuits for the sru and/or the ats-2000 f75; input circuit paths for power, stimuli, signal sequencing/conditioning; output circuit paths for logic level analysis, voltage measurements, rf measurements, loads, signal conditioning

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
