Overall Length:

32.100 inches

Overall Height:

12.000 inches

Overall Width:

17.500 inches

End Application:

An/urc-10 (v) 4, radio set

Special Features:

C/o wiring between the sru matingconnectors and system resource interface connections; load, signal conditioning circuits and special switching circuits; input circuit paths for power, stimuli, signal sequencing; output circuit paths for logic analysis, loads, signal conditioning

Functional Description:

Provides interface between the global memory and: computer support system, test support recording device, stand alone control panel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A537k0
