Overall Length:
32.100 inches
Overall Height:
12.000 inches
Overall Width:
17.500 inches
End Application:
An/urc-10 (v) 4, radio set
Special Features:
C/o wiring between the sru matingconnectors and system resource interface connections; load, signal conditioning circuits and special
switching circuits; input circuit paths for power, stimuli, signal sequencing; output circuit paths for logic analysis, loads, signal conditioning
Functional Description:
Provides interface between the global memory and: computer support system, test support recording device, stand alone control panel
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A537k0
