Dc Voltage Rating:

28.0 volts

End Application:

An/alq-172 se, radio frequency assembly test station, 4920012077057

Adjustment Method:

Switch

Frequency Range:

+0.0/+18.0 gigahertz

Switch Quantity:

11

Special Features:

Provides fully integrated interface from rf instrumentation to unit under test; all system level rf switching/signal processing is done by this processor over the dc-18 ghz range

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
