Average Life Measurement:

Not rated

End Application:

An/alq-172

Circuit Construction Type:

Solid state

Frequency Per Channel:

0.0 gigahertz operating channel and 20.0 gigahertz operating channel

Pulse Modulation Type Per Channel:

Frequency operating channel

Signal Data Type Per Channel:

Operating channel pulse modulation

Special Features:

Ggpib programmable synthesized signal generator/sweeper; provides 5 freqmarkers, marker sweep, marker to center freq, and marker difference; pulse modulation, freq modulation, amplitude modulation; cw mode; 50 ms switching time; center freq/sweep width 10.0-19.9ghz; output level range -10 to plus 20dbm; c/o hp8341b, synthesized signal generator sweeper; option 003, low harmonics; option 004, rear panel rf output with attenuator; option-806, rackmount and slides

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A32200
