End Application:

F-16a, b, c, d aircraft

Installation Design:

Floor

Battery Type For Which Designed:

Dry

Test Lead Quantity:

3

Special Features:

Used to apply load to inertial navigation unit battery, saft p/n 17470, litton p/n 989127-0002, singer p/n a510a012-101; operates from aircraft 28 vdc equipmt power or 9-v batteries

Functional Description:

Monitors battery voltage under load and removes load after 3 seconds

Reference Data And Literature:

Serd 16pr011, contract no. F3365784-c-0247

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-c
