Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

Major Components:

Power panel; control panel; high voltage panel; dc power supply; wattmeter; dig multimeter; oscilloscope

End Application:

An/alq-161a; b-1b aircraft

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Power; frequency

Operating Test Capability:

Output

Phase:

Three

Functional Description:

Used to test dual traveling wavetube power supply p/n 83d0056-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
