Circuit Current For Which Designed:

Dc

End Application:

Atthd to engine compartment equipand wiring instl, p/o dc power supply system of the a-7d/k acft

Installation Design:

Panel

Circuit Attachment Method And Quantity:

2 threaded stud

Nuclear Hardness Critical Feature:

Nonhardened

Style Designator:

Round flush mtg w/4 tabs

Supplementary Features:

T.O. 1a-7d-4-11; indicates the state-of-charge of the sealed lead acid battery

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
