End Application:

Milstar fsd phase 2 digital test station, l393, serd 360

Frequency Range:

+600.0/+4800.0 hertz

Test Item Connection Method:

Jack and standard tube pins

Special Features:

Sci control interface, 5 vdc power

Functional Description:

Provides electrical connection and fault isolation between rfa control, p/n 654-0731-001, and sci control, p/n654-0730-001

Reference Data And Literature:

Serd 371, raytheon/rockwell contract f19628-85-0004

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
