End Application:
Milstar fsd phase 2 digital test station, I393, serd 360
Frequency Range:
+600.0/+4800.0 hertz
Test Item Connection Method:
Jack and standard tube pins
Special Features:
Sci control interface, 5 vdc power
Functional Description:
Provides electrical connection and fault isolation between rfa control, p/n 654-0731-001, and sci control, p/n654-0730-001
Reference Data And Literature:
Serd 371, raytheon/rockwell contract f19628-85-0004
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A537k0
