Overall Length:

16.812 inches

Overall Height:

1.250 inches

Overall Width:

6.370 inches

End Application:

Alm-195 b-52h/mc-130e/h

Indicator Type:

Digital display

Installation Design:

Panel

Frequency Response Range:

+0.000/+1.000 megahertz

Display Type:

Light emitting diode

Measurement Range:

+0.1/+300.0 volts, dc single indicator 3rd range

Criticality Code Justification:

Feat

Circuit Attachment Method And Quantity:

2 pin

Special Features:

Used with wavetek 680 test instrument; 3 different scale lengths: 4.490in. Lg, 1.590 in. H; 1.690 in. W; plugin unit; plugs into wavetek aff 150-033503 (nha); has dc coupling; 4-wire measurement; electrostatic discharge sensitive

Nuclear Hardness Critical Feature:

Nonhardened

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
