End Application:

Radio freq test station p/n 717744000-009

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Component Type And Quantity:

16 attenuator and 4 coupler and 1 filter and 1 fuse and 1 fuseholder and 1 lampholder and 7 microcircuit and 3 power supply and 1 relay and 4 resistor and 6 switch

Special Features:

Major components and quantity: amplifiers 2; crystal detector 2; power divider 2; terminal boarder 3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
