Ac Voltage Rating:

Between 115.0 volts and 208.0 volts

Major Components:

Cabinet assembly; test operator console including keyboard, monitor, printer; cable set including electrical data cable, optical data cable, uut power cable, mating connector for input power cables

End Application:

5895-01-309-8392 an/tyq-2 (v) digital communication unit

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Functional operations and troubleshoots

Phase:

Single/three

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
