Dc Voltage Rating:

28.0 volts

Major Components:

Test point connectors, test jacks

End Application:

Power supply, p/n 6267b (serd 44501)

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Power switching

Special Features:

Workbench use; incl cables

Functional Description:

Serves as interface between powerswitching module, p/n 2121840, and digital multimeter, serd 74459

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
