Overall Length:

24.700 inches

Overall Height:

8.600 inches

Overall Width:

17.500 inches

Ac Voltage Rating:

110.0 volts and 220.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Electrical Power Source Relationship:

Operating

Unpackaged Unit Weight:

49.000 pounds

Special Features:

S80 channels at 100 mhz; 40 channels at 200 mhz; 20 channels at 400 mhz; 4-46 degc operating temp; accessories supplied: probes, probe connectors w/flying leads, grabbers, power cord, training kit, operating manual, & pouch; 12 external clocks; rs-232c & ieee-488 compatible; horizontal freq 19.23 khz; probe input resistance 1 mohm porm 2 pct; input capacitance porm 6 pf normally-w/flying leads porm 15 pf; provides 2 sockets to test probe's 2 clocks & 8 data channels; battery back-up cmos memory

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-c
