Switch Position Quantity:

1

End Application:

Radio frequency surveillance/electronic countermeasures defensive avionics system, an/alq-161a

Adjustment Method:

Switch

Test Item Connection Method:

Jack

Switch Quantity:

4

Functional Description:

Provides interface between lru and logic analyzer breakout box; provides capability of performing timing and state analysis on the 1205 digital bus

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A537k0
