Ac Voltage Rating:

Between 90.0 volts and 250.0 volts

Frequency Rating:

Between 48.0 hertz and 440.0 hertz

Frequency Range Rating:

+0.000/+7.100 gigahertz

End Application:

Type iii radar, peace shield

Input Impedance Rating:

50.0 ohms

Frequency Band Quantity:

3

Recording Device Type:

Graphic pen/ink

Special Features:

Built-in freq counters, signal processing, and continuous resolution freq tuning; ieee-488 interface function capability; signal sensitivity m134 dbm; push button occupied bandwidth and noise normalization functions

Functional Description:

Fault isolate/test analog lru

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A532p0
