Frequency Range Rating:

+0.001/+60.000 megahertz

End Application:

Nha bmews p/n g452070; an/fps/120radar set

Special Features:

Receives if waveform at 60 mhz and splits into 5 separately controlled signals for injection into receiver circuits for test purposes; both amplitude and phase shift selection, 0 to 180deg

Reference Data And Literature:

Contract f19628-88-c-0032

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
