End Application:

An/apq-17 (v) radar set

Supply Items And Quantities:

6625-01-312-3513 computer control memory unit 1 and 6625-01-316-4910 rfsignal generator converter, measurement 1

Functional Classification:

Aa-9.3

Special Features:

Selected portions of existing design and new design; provides rf measurement and stimulus capability for testing apq-17 (v) radar set; 22 to 29 vdc20 amps, 2 conductors, 115vrms porm 10pct; 50/60 hz; test signals brought to test points on breakout boxes

Reference Data And Literature:

33d7-44-343-1 or -4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
