Current Type:

Dc

End Application:

Radar set, an/fpz-120, bmews

Internal Battery Accommodation:

Not included

Criticality Code Justification:

Feat

Special Features:

Incl amplitude and phase shift (0180 deg) selection; electronic discharge sensitive

Functional Description:

Receives sample of if waveform at60 mhz, splits it into 5 separately controlled signals for injection into receiver circuits for test purposes.Tests radar set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-j
