Overall Length:

17.500 inches

Overall Height:

16.875 inches

Overall Width:

11.375 inches

Ac Voltage Rating:

100.0 volts and 115.0 volts and 200.0 volts and 230.0 volts

Frequency Rating:

50.0 hertz and 60.0 hertz

Electrical Power Source Relationship:

Operating

Recording Method:

Sensitized paper

Total Channel Quantity:

18 and 30

Information Recorded:

Dc voltages; 9 types of thermocouples/rtd

Phase:

Single

Functional Description:

Hi-speed, multi-channel microprocessor 250 mm recorder, monitors and prints both digital and analog forms

Supplementary Features:

13-digit red led (7-segment) display; data displayed channel number, alarm status, polarity (-), measured data, and engineering unit; panel mount model

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T198-a
