Overall Length:

12.100 inches

Overall Height:

5.600 inches

Overall Width:

6.050 inches

End Application:

F111f a/c tf30 engine

Special Features:

Part of an/usq-8 (v) 3, turbine engine monitoring system

Functional Description:

Monitors all system sensors & signals, converts them to a digital sig. Format, processes data as programmed & stores the info. For eventual transfer to the diagnostic display uni (ddu) or data collection unit(dcu) through the umbilical display unit(udu)

Reference Data And Literature:

5e19-2-2-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T198-a
