Overall Length:

19.600 inches

Overall Height:

6.969 inches

Overall Width:

16.500 inches

Frequency Range Rating:

+0.001/+26.500 gigahertz

End Application:

Milstar

Modulation Type:

Pulse

Calibrated Signal Output Range:

Minus 110 dbm to plus 10 dbm

Special Features:

Opt 913 rack mounting flange kit; e69 internal cill tma's for faster through put; mate compatibility

Functional Description:

General purpose and precision microwave network analysis

Supplementary Features:

1 to 4 frequency resolution, 100 ns pulse width capability, complete analog sweeper; dc to 100 khz amplitude modulation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-j
