Overall Length:

16.620 inches

Overall Height:

7.650 inches

Overall Width:

14.400 inches

Current Rating:

250.000 amperes

Special Features:

Csbh-voltage in volts and currenttype-general characteristics: power requirements: voltage: 90-132 or 198- 264 vac; 48-66 hz. Power: 250 va max

General Description:

Analyzer, peak power performs (8) eight automatic timing measurements (rise time, fall time, pulse width, pri, prf, duty cycle, and delay). five (5)prf, duty cycle, and delay). five (5)power measurement (peak power, averagepower, pulse top/base amplitude, and overshoot). sensor inputs (channels 1& 4) frequenct range: 50mhz to 40 ghz, sensor dependant. Power range: -32 to +20dbm. video inputs - channels 2&3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
