End Application:

Awacs

Installation Design:

Floor and nonportable

Operation Method:

Cathode emission and conductance and current and dynamic mutual conductance and dynamic mutual contact and dynamic transconductance and emission and peak emission and power amplification and proportional mutual conductance

Special Features:

Test station is housed in 3 rooms

Functional Description:

Tests new and rebuilt klystron power amp tube assemblies

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-c
