End Application:

SPEC-TR-UMA-NALY

Unit Type:

Spectrum analyzer

Functional Classification:

Aa-12.11

Special Features:

Contains an input attenuator, module fits slot 7 or 8, 2/8 width

Functional Description:

Converts input signals to a 21.4 mhz if output, mixing & continuous preselector peaking from 100hz to 22ghz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-b
