End Application:

Hp 3852a data acquisition and control system

Unit Type:

Multiplexer

Special Features:

Mfg name-relay multiplexer

Functional Description:

Reduces the effects of real-world measurement error in a multi-channel system; optimizes thermocouple measurement accuracy; measures strain accurately

Supplementary Features:

Multiplexes-voltage, resistance, thermocouples, strain gages; 20 channel relay multiplexer w/thermocouple compensation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-b
