Major Components:

Digital multimeter; dmm case; time domain reflectometer; insulation tester; insulated remote assembly; levels & sights; cable fault location; current probe; high voltage probe; socket adapters; transit case

Accessory Component Quantity:

11

Internal Battery Accommodation:

Included

Inclosure Feature:

Multiple item w/carrying case

Test Type For Which Designed:

Electrical aspects of airfield lighting systems

Functional Description:

The design of this test set, designated "malts" is to provide capability to test and troubleshoot all the electrical aspects of airfield lighting systems. Malts is designed to test all lamps, lamp fixtures, isolation transformers, shielded and unshielded cables, and current regulators as well as other minor components of airfield lighting systems. All test set components rely on internal batteries for all their power requirements. All components are housed in a transit case which is approximately 36 in. Lg., 18 in. Wd. & 18 in. Deep. The complete test set weights approximately 80 lbs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
