Overall Length:

19.000 inches

Overall Height:

7.000 inches

Overall Width:

14.000 inches

Frequency Rating:

Between 48.0 hertz and 66.0 hertz

Unpackaged Unit Weight:

21.200 pounds

Special Features:

Option 6006 is the precision time base (1ppm); plastic case; freq measurement accuracy porm 5ppm, power 90-133vac and 190-260vac, opr ranges synchronous 50 bps-15 mbps, asynchronous 50 bps-20 kbps, recovered clk 50 bps-520 kbps, equiped w/built-in rs-232 interface and other optional interfaces may be installed through interface module slot in the rear panel; built-in automatic self test and non-volatile memory

Functional Description:

Alalyzes, evaluates & troubleshoots digital communications systems & equipment; performs bit error rate, signal, timing & performance analysis including clock slip errors, inverted clock detector, clock recovery, jitter generation & measurement, delay measurement, & data polarity detection

Supplementary Features:

Plastic case; not revision specific

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T263-c
