Frequency Rating:

Between 40.0 megahertz and 40000.0 megahertz

End Application:

Pmel labs calibration systems

Electrical Power Source Relationship:

Operating

Special Features:

Vector network analyzer system is comprised of the following hewlett packard equipment: analyzer, model 360b wopt 2a & c1; reversing tests set pn 3611a; swept freq synthesizer pn 6769b; calibration kits 9: sma pn 3650-1, gpc-7 pn 3651-1, k pn 3652-1, n pn 3653, airline gpc-7 lrl pn sc4670, airline sma/3.5 mm lrl pn sc4676, 2.4 mm pn sm4505, waveguide wr28 pn sm4506, waveguide wr42 pn sm4507; verification kits 5: 3.5 mm pn 3666, gpc-7 pn 3667, k pn 3668, type n pn sm4508, 2.4 mm pn sm4509; test port adapters 2: gpc-7 pn 34ua50, n male pn 34un50; test port connector, universal pn 34uq50; test port cables 2: gpc-7 flexible 30 cm pn sm4510, k flexible 30 cm pn sm4511; single sheet/tractor feed printer pn sm4512

Functional Description:

Improve microwave mismatch calibration capability of type iia precision measurement equipment laboratories

Supplementary Features:

Ta734, section aaa

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T263-c
