End Application:

Pacer special

End Item Source:

1w025

End Item Name:

MICR-OO-MME-TERN

Special Features:

Probe, test, 4 wire, current source hi and lo, voltage sense hi and lo, operating temp 0/50 degrees c.

Functional Description:

Facillitate resistive measurement of conductive aircraft surface materials with resistivities of less than one ohm per square, and up to 2400 ohms per square. The test probe shall operate over a range of 200 milliohms to 200 kilohms, pressure range of 40-70 grams per tip, tip radii of 10 mil, with a 62 military spacing. Contains a normally open test switch. Weight 8 oz, 2.5 inch dia. And 6 inch length, with at least a 6 toot cord

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
