Circuit Current For Which Designed:

Ac and dc

Overall Depth:

43.9 millimeters

Overall Height:

231.5 millimeters

Overall Width:

97.0 millimeters

Furnished Items And Quantity:

Holster

Indicator Type:

Digital display and bargraph

Installation Design:

Hand held

Frequency Response Range:

+0.500/+10.000 kilohertz

Background Color:

Silver single indicator all ranges

Power Source:

Internal

Display Type:

Liquid crystal

Display Digit Quantity:

4-1/2

Measurement Range:

+0.0/+1000.0 amperes single indicator all ranges

Accuracy Rating:

2-3 pct single indicator all ranges

Display Color:

Black single indicator all ranges

Circuit Attachment Method And Quantity:

1 clamp-on

Special Features:

Measures current and frequency; records max/min/avg freq & current; measures crest/peak value; smoothes 3 sec avg reading of rms current or freq

Style Designator:

Clamp-on

Supplementary Features:

Autoranging

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A310a0
