End Application:

Prism 3002c logic analyzer

Component Type And Quantity:

2 timer and 1 probe and 2 clock

Special Features:

Can detect problems such as bus contention, dma problems, glitches, propogation delays, cross talk, handshaking errors, race & hazards, setup and hold violations, metastability or ringing; 3 acquisition modes, highest resolution mode provides 400 mhz timing across 20 channels, each channel can record 24k transitions; dual mode provides 200 mhz timing each channel recording 12k transitions; 2 ghz mode provides 4 channels of 500 ps resolution each channel recording 120k transitions; 15 preset trigger tests, 2.5 ns glitch detection locates hardware faults; designed for portable use

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
