Ac Voltage Rating:

115.0 volts or 230.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Major Components:

Bert, breakout box, interfaces, monochrome monitor, analyzer, emulator, disk storage, standard keyboard, printer

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Tests, analyzes, emulates; isolates what is at fault such as software, computer, modem, line, printer, or terminal

Phase:

Three

Special Features:

Includes interface rs232c; other options available

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
