Major Components:

C/o 8970b noise figure meter, 8971c opt 001 noise figure test set, 8673g synthesized signal generator, and 346c noise source 10mhz to 26.5ghz

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Noise measurements range 0-30 db; freq range 10mhz to 26500mhz

Functional Description:

Tests all weapon platforms supported at wr-alc and evaluates first articles, failure analysis, and design analysis projects

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
