**Overall Length:**

18.950 inches

**Overall Height:**

8.050 inches

**Overall Width:**

12.900 inches

**Ac Voltage Rating:**

110.0 volts and 220.0 volts

**Frequency Rating:**

Between 47.0 hertz and 440.0 hertz

**Frequency Range Rating:**

+100.000/+33000000000.000 hertz

**Phase:**

Single

**Special Features:**

Bandwidth from 3 hz to 10mhz: can be used above 33ghz with external mixers: can store setups: 2 gpib ports: all spec's are after 30 min.  
Warmup: resolution, 100hz 1pct accuracy: display liquid crystal color shutter, 10x10 display: 40k ram: internal battery: sweep speed range 200s to 2ms: triggering: internal, external and line: also provides probe power, ref signal output. Also outputs the x, y and z output of display

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A532p0
