Major Components:

Test positioner, gain horn assembly, gain horn mount, transfer switch, waveguide isolator, coax to waveguide

End Application:

F-16 air combat fighter

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Positioning for antenna measurements and tracking applications

Special Features:

0pn 421543 is altered from pn 421544 by machining and the addition of a standard gain horn assembly & mount, coaxial transfer switch, waveguide isolator, coax to waveguide model 11a-8.2, waveguide to coax adaptor and compact range slide assembly

Relationship To Similar Equipment:

Similar to scientific atlanta model 5028a over model 5021a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
