Width:

55.000 inches

Major Components:

Two bay equipment rack pn 3005951-001; communication panel pn 3005527-101; oscilloscope pn 2430a opt1r; computer, monitor, keyboard 7025-01-379-6722; decryptor 5810-01-153-9657; 2 powersr1070487 and dcs40-25m9a; card cage pn 3004579-101; spectrum analyzer pn 497p opt2; rf signal generator pn hp8665a opt3, 5, 909; uut interface support pn 3004573-101; rf drawer assembly pn 3004568-101; uut interface assembly 5998-01-379-8894; test set interface pn 3005525-101; antenna coupler pn 3005949-101; hat switch jumper housing pn 3006025-101; and an ftt tester, no part number identified

Depth:

46.000 inches

End Application:

Warhead replacement tactical telemetry (wrttp), aim-120 (se)

Internal Battery Accommodation:

Included

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Wrttp missile testing and certification of the wrttp flight terminationtransponder

Height:

71.000 inches

Reference Data And Literature:

Serdf08626-92-c-0001reva

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
