Inclosure Material:

Aluminum

Frequency Rating:

Between 26.0 megahertz and 30.0 megahertz

End Application:

P/N1-3A-657-05RA

Closure:

Included

Channel Quantity:

2

Test Type:

Noise

Amplifier Channel Accommodation:

Multiple

Indicator:

Not included

Criticality Code Justification:

Featg

Special Features:

Electrostatic dischrg sensitive

Supplementary Features:

C/o noise analyzer 6406847-6, device controller ccas, id plate, slide test drawer, inner mbr 2141972-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-g
