Average Life Measurement:

Not rated

End Application:

Hp ats 1000 automatic test systems; an/gsm 348

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Rack

Circuit Construction Type:

Solid state

Special Features:

Accommodates 5 types of switchcards in any combination up to 25 cards; built-in 1768 pin matrix interface panel

Functional Description:

Provides high density, multifunction switching of signals up to 10 mhz; improves signal performance and eliminates spider web cabling

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
