Overall Length:

11.000 inches

Overall Height:

2.000 inches

Overall Width:

7.000 inches

Special Features:

Provides the following functions: isolated test point connections to both 1553 busses on the rt-1341 (v)8 receiver-transmitter; 1553 line termination equal to the characteristic impedance of the transmission line 70 ohms, isolation transformers, resistors for each of rt-1341 (v)8 busses; terminal address switches for setting the receiver-transmitter terminal address inputs; an acp control test cable interface to the acp adapter panel 966d-18 & the acp cp-2024 control port; a rs-232 select switch provides the connections from the acp cp-2024 rs-232 system remote control system monitor output to either the acp adapter panel 966d-18 system remote/monitor or the rt-1341 (v)8 rs-232; interconnects & controls the simulated operational configuration an/arc190 hot mock up containing the rt-1341 (v)8 receiver-transmitter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A537k0
