Width:

17.600 inches

Depth:

22.400 inches

Electrical Power Source Relationship:

Operating

Test Type For Which Designed:

Current; resistance; capacitance

Special Features:

Test current ranges 10 microamps, 100 microamps, 1 milliamp, or 5 milliamps constant current 10 vdc max; continuity & insulation test 10 ohms to 500 kohms; accuracy 5 pct porm 5 ohms; test speed 500 points/sec

Functional Description:

Provides continuity & insulation test, miswire test, component test & measurement, assembly assistance, in-process test of cable harness, backplanes & card cages on the alr-56c radar warningreceiver set lru-2c

Height:

7.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
